

Deer Creek Before the Dam:

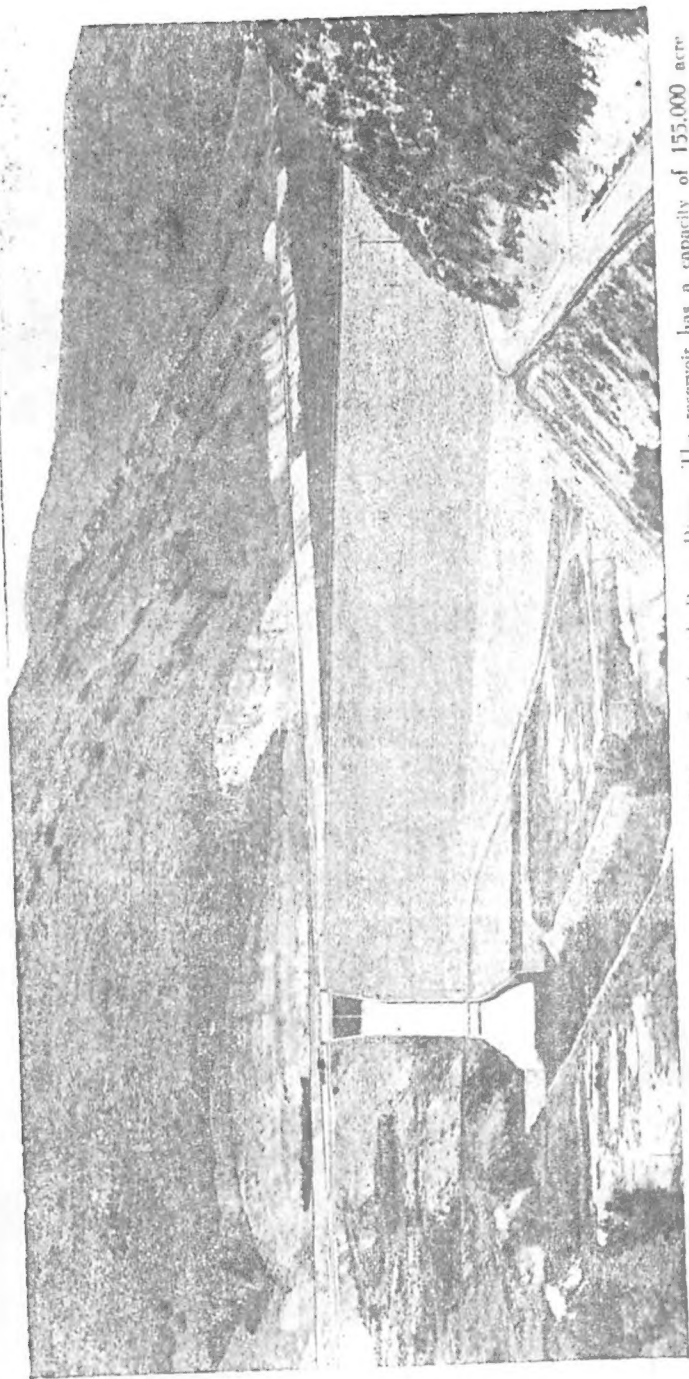

Cattle feed on slop & stearns
harvest are many to harvest from of which 200000 trees

After cattle have been taken care of families live there

Cattle fish on slop & stearns
camped on way to Daves grove of Cotton Wood trees

Later when dam built Men's families lived there.

VIEW OF DEER CREEK RESERVOIR

Constructed in Provo Canyon near the junction of Deer Creek with Provo River. The reservoir has a capacity of 155,000 acre feet. It filled this year for the first time. It will furnish supplemental water supply to Salt Lake, Provo, Lehi, American Fork, Pleasant Grove, Lindon, Orem, Highland Conservation District and numerous irrigation companies in Salt Lake, Utah, and Summit counties. Spillway and dam shown in background. Small section of the lake above the dam in upper right corner. This reservoir furnishes a considerable supply of mountain water to Geneva Steel Plant and made it location in Utah possible.
